Muhammad Amjad Aziz Shah

Software Engineering Student

Islamabad, Pakistan | amjadshahg26@gmail.com

github.com/amjadazizshah

Professional Summary

Seventh-semester software engineering student with project experience in responsive web development, React Native applications and Python desktop software. Builds interfaces, connects REST APIs and works with local data storage. Seeking opportunities in frontend or junior software development.

Education

B.E. Software Engineering | Semester 7

Iqra University, Islamabad Campus

Technical Skills

Frontend: JavaScript, TypeScript, React, Next.js, HTML, CSS, Tailwind CSS, Vite

Mobile and backend: React Native, Node.js, Express, Python, REST APIs, Groq integration

Data and workflow: SQLite, Git, GitHub, responsive UI implementation

Selected Projects

Risel Growth Agency

Client website | React, Vite, Framer Motion, EmailJS

- Built a responsive client website with animated service sections and mobile navigation.
- Integrated an EmailJS enquiry form using React, Vite and Framer Motion.

github.com/amjadazizshah/Risel-Agency

LunaAI

Mobile source project | React Native, TypeScript, Node.js, Express

- Built a React Native chat interface with conversation persistence through AsyncStorage.
- Connected a Node.js and Express backend to Groq for AI responses.
