TECHNOLOGY

Frontend
React, Next.js, JavaScript, TypeScript, HTML, CSS

Mobile
React Native, AsyncStorage

Backend and AI
Node.js, Express, Python, REST APIs, Groq

Data
SQLite, MySQL, MongoDB

TOOLS

Development
Git, GitHub, Vite, Tailwind CSS, Framer Motion

FOCUS

Work interests
Responsive interfaces, web and mobile development, API integration

AMJAD SHAH

SOFTWARE ENGINEERING STUDENT

PROFILE

Seventh-semester B.E. software engineering student building responsive web interfaces, React Native apps and Python software. Experience connecting REST APIs, integrating AI services and managing application data. Seeking opportunities in frontend or junior software development.

EDUCATION

IQRA UNIVERSITY

Islamabad Campus

B.E. Software Engineering

In progress | Semester 7

PROJECT EXPERIENCE

Risel Growth Agency

Client website | React, Vite

- Built responsive service sections, interface animation and mobile navigation.
- Integrated an EmailJS enquiry form and Framer Motion interactions.

View project

LunaAI

Mobile source project | React Native, Node.js

- Built an AI chat interface with saved conversations through AsyncStorage.
- Connected a Node.js and Express backend to Groq for AI responses.

View project

Restaurant POS

University project | Python, Tkinter, SQLite

- Developed menu management, order entry, tax calculation and billing workflows.

View project

MinterCoach

Independent prototype | Next.js, React Native

- Built project-based interview practice with web and Android/iOS source, guided feedback and saved sessions.

ADDITIONAL WEB WORK

Penn Automotive: services and appointment-request website. Saim Electric Service: responsive industrial-services frontend.
